Theory and methods. *Mathematical proceedings of the Cambridge Philosophical Society*, 24(1):89–110, 1928. CODEN PCPSA4. ISSN 0008-1981. Page 91 of this paper introduces atomic units for *length* ( $a_H = h^2/(4\pi^2me^2)$ ), the radius of first Bohr orbit of hydrogen), *charge* ( $e$ , the electron charge), and *mass* ( $m$ , electron mass). From these are derived the *unit of action* ( $h/(2\pi)$ ), the *unit of energy* ( $e^2/a$ , twice the ionization energy of hydrogen), and the *unit of time* ( $1/(4\pi cR)$ ). The value  $R$  is the Rydberg constant.

**Meitner:1939:DUN**

- [MF39a] Lise Meitner and Otto Robert Frisch. Disintegration of uranium by neutrons: a new type of nuclear reaction. *Nature*, 143(3615):239–240, February 11, 1939. CODEN NATUAS. ISSN 0028-0836 (print), 1476-4687 (electronic). URL <http://www.nature.com/nature/journal/v143/n3615/pdf/143239a0.pdf>. This paper, and [MF39c], both submitted 16 January 1939 (see [Mei62]), provided the first published explanation of nuclear disintegration, called ‘nuclear fission’ by Frisch, that was first observed experimentally by Hahn and Strassmann in December 1939 [HS39b]. Frisch’s paper [Fri39] describes the first experimental confirmation. It was these results that Niels Bohr intended to hold confidential until their journal publication during his January 1939 trip to the USA, but his traveling companion Léon Rosenfeld [Ros72] wasn’t informed of that intent, and the news escaped and spread quickly.

- [TWD03] Barbara M. Terhal, Michael M. Wolf, and Andrew C. Doherty. Quantum entanglement: a modern perspective. *Physics Today*, 54(4):46–52, April 2003. CODEN PHTOAD. ISSN 0031-9228 (print), 1945-0699 (electronic). URL <http://www.physicstoday.org/resource/1/PHTOAD/v56/i4>. This paper discusses the origin of the concept of *quantum entanglement*, and the famous *Schrödinger's cat* experiment, in Schrödinger's famous three papers [Sch35c, Sch35a, Sch35b], and the later work of John Bell [Bel64]. Those papers were a response to the famous EPR paper [EPR35] that first raised the paradox described by entanglement, and that caused much debate with Bohr, Schrödinger, and others. See also [Eve57, Whe57, Vil86].
