Selection

Track Selection **JBoss World Speaker Submissions**

Emerging and Next-generation Technologies: Tell us how you are using and/or extending JBoss technologies to solve real business-IT problems today. Suggested topics include how you are leveraging existing JBoss runtimes and frameworks in conjunction with other development frameworks, emerging APIs, new standards, cloud computing paradigms, etc. to create the rich Internet applications and services that deliver new heights of functionality.

Are you expecting any co- 1
presenters? If so, how
many?(Please use numbers)
